

18W CAR RADIO POWER AMPLIFIER—YD1028

DESCRIPTION

The YD1028 is an integrated class-B dual output amplifier in a 9-lead single in-line (TO220Z9) plastic power package. The device is primarily developed for car radio applications.

FEATURES

- *Requires very few external components for Bridge Tied Load (BTL), Stereo or BTL application;
- *High output power, Fixed gain, Good ripple rejection;
- * Identical inputs (inverting and non-inverting), Low offset voltage at output (important for BTL);
- *Mute/stand-by switch, No switch-on/switch-off plop;
- *Load dump protection, AC and DC short-circuit-safe to ground and V_{cc} , Thermally protected;
- *Reverse polarity safe;
- *Capability to handle high energy on outputs ($V_{cc}=0V$);
- *Protected against electrostatic discharge.
